## HOSPITALS OVER 300 BEDS

Survey Period: Q3 2013 – Q1 2014

Brown-Wilson Group annually evaluates leading healthcare/medical software and service providers across 18 operational excellence key performance indicators completely from the perspective of the client experience. Independent and unbiased from vendors' influence, over 400,000 healthcare IT users are invited to contribute. Suppliers also encourage their clients to participate to produce current and objective customer service data for buyers, analysts, investors, consultants, competitive suppliers and the media. For more information or to order customized research results, please contact the Client Resource Center at +1 727.953.3355 or [Doug.Brown@Brown-Wilson.com](mailto:Doug.Brown@Brown-Wilson.com)

## Part One: Aggregate Black Book EMR EHR Survey Findings 2014

# PART ONE: COMPREHENSIVE BLACK BOOK SURVEY FINDINGS, AGGREGATE RESPONSES

## *STATE OF THE EMR EHR INDUSTRY 2014*

The U.S. is one of the most developed healthcare markets globally. The annual healthcare spending of the country reached around US\$ 2.9 Trillion in 2011, which is expected to soar to US\$ 3.5 Trillion by 2015. This growth was attributed to the increasing usage of patent drugs, high administrative costs, and expensive hospital care. The enormous healthcare costs, which are expected to increase in the future, will pressurize the government to cut budget funding from other important segments. To gradually reduce this massive economic burden and to revitalize the prompt healthcare services, a flurry of regulatory acts has been passed. e-Health being the most prominent source of cost containment is being targeted by both public as well as private sector entities which help industry to grow manifold in last few years.

The e-Health market has evolved as one of the fastest growing U.S. industries and remained almost immune even in the tough post-recessionary scenarios. A number of federal policies and acts worked as catalysts for market growth and are expected to drive market developments also. The e-Health adoption and its will open widespread market opportunities for the healthcare sector, which is poised to grow at a CAGR of around 15% during 2012-2017. The 2009 economic stimulus set aside \$27.4 billion to jump-start the switch to electronic records. The law offers doctors up to \$63,750 over five years to help pay for the change if physicians can prove they're making meaningful use of the systems by scanning records and submitting prescriptions electronically.

180,000 of the roughly 530,000 eligible Medicare and Medicaid providers—hospitals, clinics, and private practices—had registered to participate in the government stimulus program, with about 47,000 receiving initial payments for demonstrating meaningful use of digital records, government figures show. Spending on electronic systems by health providers could grow 88 percent to \$37 billion by 2015

The EMR, EHR, Practice management, e-prescribing, and telehealthcare sectors will witness strong growth due to technological advancements that will make treatment and diagnosis simpler. Additionally, individuals belonging to the young population are tech savvy and appreciate IT adoption in healthcare offerings. This population segment spends more on e-health and m-health applications and the trend is expected to remain applicable in the coming years also.

Spending on electronic medical records may jump 80 percent by 2015, but adoption is being slowed by confusion over technologies. Many doctors who have made the shift to the new systems aren't tapping their full power. Only a fraction of physicians use their software to exchange information with other providers because of difficulties transmitting data.

Tech investors and entrepreneurs are jumping into the saturated EMR marketplace. About 1100 companies have started up, more than doubling the number of vendors in four years. That surge has many in the industry concerned that consolidation is inevitable. Some vendors may try to stay afloat without consolidating by selling doctors add-ons such as practice management, voice recognition and other services and products.

National data for 2013 indicates that 80% of office-based physicians were using some portion of e-Health technology/ electronic medical record (EMR)/electronic health record (EHR) system. However, only 34.8% of physicians are using a fully functional EHR system. Fully functional EHR System capabilities include electronic charts, test ordering and reports management, e-prescriptions, consultation referrals and reports, limited clinical decision support, limited disease management support and some quality reports.

## Part One: Aggregate Black Book EMR EHR Survey Findings 2014

### FINDING 1: TOTAL SURVEY RESPONSE RATE 2013-2014

Survey Conducted in Q3 of previous calendar year	Validated Survey Responses by EMR EHR In Use or Under Implementation	Validated Survey Responses by Physician Practices Not Yet Purchased EMR EHR

## Part One: Aggregate Black Book EMR EHR Survey Findings 2014

A Basic EHR System is defined\* as including all of the following functional components: patient demographics, patient problem lists, electronic medication lists, clinical notes and documentation, order entry management of prescriptions, and viewing capability of laboratory and imaging results (reports). A Fully Functional EHR System is defined as including the basic system functionalities as clinical notes and documentation of the medical history and follow-up, ordering of laboratory and radiology tests, electronic transmission of prescriptions and orders, and electronic return of images. Fully functional also includes clinical decision support with warnings of drug interactions or contraindications, highlighting of out-of-range test levels and reminders regarding guideline-based interventions or screening.

## Part Two: Top 20 Inpatient EHR Vendors Academic Medical Centers & Hospitals Over 300 Beds

### SUMMARY

#### **SURVEY OVERVIEW**

From Q2 2013 through Q12014, the Black Book Rankings' electronic medical record, electronic health record, e-Prescribing, Practice Management and e-Health client/user survey investigated over 611 EMR vendors utilized by 22,059 validated EMR users nationwide for rankings and an additional 10,727 respondents in pre-use, implementation, system decision-making or purchased but not yet installed status.

#### **KEY SATISFACTION FINDINGS**

##### **Key finding: most important customer satisfaction KPIs**

Customization, interfaces, reliability and deployment (particularly implementation-related performance) are the most important attributes influencing EMR client companies' satisfaction with their EMR vendors.

##### **Key finding: EHR/EMR vendor satisfaction is highest among larger physician groups**

Clients with more than 25 physicians in a single setting are significantly more satisfied with their EMR than are single and small group practice (2-5, 6-25 physician group) clients. Strong satisfaction in the larger practice segment surged to 90.2% in 2013, while small and single practices maintained a lesser overall EMR satisfaction in 72.5% of users.

## Part Two: Top 20 Inpatient EHR Vendors Academic Medical Centers & Hospitals Over 300 Beds

### ***BLACK BOOK METHODOLOGY***

#### ***HOW THE DATA SETS ARE COLLECTED***

Black Book collects ballot results on 18 performance areas of operational excellence to rank vendors by electronic medical and health record product lines. The gathered data are subjected immediately to an internal and external audit to verify completeness and accuracy and to make sure the respondent is valid while ensuring that the anonymity of the client company is maintained. During the audit, each data set is reviewed by a Brown-Wilson executive and at least two other people. In this way, Black Book's clients are able to clearly see how a vendor is truly performing. The 18 criteria on operational excellence are subdivided by the client's industry, market size, geography and function outsourced and reported accordingly.

Situational and market studies are conducted on areas of high interest such as e-Prescribing, Health Information Exchange, Accountable Care organization, hospital software, services providers, educational providers in e-health, benchmarkers and advisors. These specific survey areas range from four to 20 questions or criteria each.

### ***UNDERSTANDING THE STATISTICAL CONFIDENCE OF BLACK BOOK DATA***

Statistical confidence for each performance rating is based upon the number of organizations scoring the electronic medical and health records service. Black Book identifies data confidence by one of several means:

- Top-10-ranked vendors must have a minimum of ten unique clients represented. Broad categories require a minimum of 20 unique client ballots. Data that are asterisked (\*) represent a sample size below required limits and are intended to be used for tracking purposes only, not ranking purposes. Performance data for an asterisked vendor's services can vary widely until a larger sample size is achieved. The margin of error can be very large and the reader is responsible for considering the possible current and future variation (margin of error) in the Black Book performance score reported.
- Vendors with over 20 unique client votes are eligible for top 10 rankings and are assured to have highest confidence and lowest variation. Confidence increases as more organizations report on their outsourcing vendor. Data reported in this form are shown with a 95% confidence level (within a margin of 0.25, 0.20 or 0.15, respectively).
- Raw numbers include the quantity of completed surveys and the number of unique organizations contributing the data for the survey pool of interest.

## Part Two: Top 20 Inpatient EHR Vendors

Academic Medical Centers & Hospitals Over 300 Beds

### ***WHO PARTICIPATES IN THE BLACK BOOK RANKING PROCESS***

Over 380,000 practice management and physician leaders and other users ranking from hospital executives, clinicians, IT specialists and front-line implementation veterans are invited to participate in the 2014 annual Black Book EMR EHR e-Health initiative satisfaction survey. Non-invitation receiving participants must complete a verifiable profile, utilize valid corporate email address and are then included as well.

The Black Book survey web instrument is open to respondents and new participants each year from September 15 to December 31 at <http://blackbookrankings.com> and <http://blackbookpolls.com>. Only one ballot per corporate email address is permitted and changes of ballots during the open polling period require a formal email request process to ensure integrity.

### ***EMR/EHR VENDOR RANKINGS AND RESULTS – 2014***

22,059 qualified users of systems with validated corporate/valid email addresses ranked 611 EMR-EHR suppliers offering individual or bundled arrangements as part of the Black Book annual survey, conducted via web survey instruments. Additionally 14,000 about-to-be users answered questions about budgeting, vendor familiarity and vendor selection processes but current non-user ballots are not counted in the vendor ranking process of client satisfaction.

The four most highly utilized systems of EMR systems are included as subsets. Hospitals over 300 beds comprise approximately 15% of all US inpatient facilities. 1,985 hospital IT leaders from 163 facilities participated in this subset survey.

Part Two: Top 20 Inpatient EHR Vendors  
Academic Medical Centers & Hospitals Over 300 Beds

## PART TWO: 2014 RESULTS

### ELECTRONIC HEALTH RECORDS

# INPATIENT HOSPITAL & AFFILIATED PRACTICE PHYSICIANS, GROUPS & FACILITIES

Each year, the Brown-Wilson Group and BWG's Black Book EHR research division, Black Book Rankings, undertake an annual survey into organizations' satisfaction with their outsourcing service providers. These research results are recognized as the most extensive and representative perception study of EHR vendors, validated by over 22,000 respondents from EHR users nationwide on nearly 500 EHR EMR vendors.

The American Recovery and Reinvestment Act (ARRA) provides strong incentives to encourage the adoption and meaningful use of electronic health records including health information exchange to improve the continuity and coordination of care and reporting of quality metrics. Medicare and Medicaid incentive payments are critically dependent on the use of certified EHRs by eligible professionals to demonstrate meaningful use including e-prescribing, health information exchange, reporting of quality metrics and providing patients with timely access to information

## Stop Light Scoring Key

**Figure 2: Color-coded stop light dashboard scoring key**

**Green** (top 10%) scores better than 90% of EMR vendors. Green coded vendors have received constantly highest client satisfaction scores.

**8.71 +**

**Clear** (top 33%) scores better than 67% of EMR vendors. Well-scored vendor which have middle of the pack results.

**7.33 to 8.70**

**Yellow** scores better than half of EMR vendors. Cautionary performance scores, areas of improvement required.

**5.80 to 7.32**

**Red** scores worse than 66% of EMR vendors. Poor performances reported potential cause for service and contractual cancellations.

**Less than 5.79**

Individual vendors can be examined by specific indicators on each of the main functions of EMR vendors as well as grouped and summarized subsets. Details of each subset are contained so that each vendor may be analyzed by function and end-to-end EMR services collectively.

## Stop Light Scoring Key

**Figure 4: Scoring key**

Overall rank	Q6 criteria rank	Company	PATIENT HEALTH DATA MANAGEMENT & ADMINISTRATIVE PROCESSING	COMMUNICATIONS & CONNECTIVITY	ORDER ENTRY & MANAGEMENT	DECISION SUPPORT & RESULTS REVIEW/MANAGEMENT	Mean
5	1	Doctors and Hospitals EHR	8.49	8.63	8.50	8.01	8.66

Source: Black Book Rankings

- **Overall rank** – this rank references the final position of all 18 criteria averaged by the mean score collectively. This vendor ranked fifth of the 20 competitors.
- **Criteria rank** – refers to the number of the question or criteria surveyed. This is the sixth question of the 18 criteria of which this vendor ranked first of the 20 vendors analyzed positioned only on this particular criteria or question. Each vendor required ten unique client ballots validated to be included in the top ten ranks.
- **Company** – name of the EHR vendor.
- **Subsections** – each subset comprises one-fourth of the total EHR vendor mean at the end of this row, and includes all buyers and users who indicate that they contract each respective EMR functional subsection with the supplier, specific to their physician enterprise.
- **Mean** – congruent with the criteria rank, the mean is a calculation of all three subsets of EHR functions surveyed. As a final ranking reference, it includes all market sizes, specialties, delivery sites and geographies.

2014 Top Inpatient Electronic Medical/Health Records Vendors

Published March 2014

## Individual EHR Vendor Key Performance, Inpatient Hospital Over 300 Beds

### 1. Vendor overall preference by similar users of all systems and vendors/peer group vertical industry recommendations for vendor expertise

Table 5: Organizational structure meets the needs of stakeholders or customers and stakeholder satisfaction is the most important priority. EHR client is likely to recommend the vendor to similar sized physician groups, physicians within the same specialty or delivery setting.

OVERALL RANK	Q1 Criteria rank	COMPANY	PATIENT HEALTH DATA MANAGEMENT & ADMINISTRATIVE PROCESSING	COMMUNICATIONS & CONNECTIVITY	ORDER ENTRY & MANAGEMENT	DECISION SUPPORT & RESULTS REVIEW/MANAGEMENT	MEAN

## Individual EHR Vendor Key Performance, Inpatient Hospital Over 300 Beds

### 2. Innovation

Table 6: Customers are also continuing to push the envelope for further enhancements to which the EHR vendor is responsive. EHR clients also believe that their vendors' technology is helping them manage practices more effectively, generate accurate records and reimbursement billings and cut their overhead in ways that were difficult or impossible to accomplish before electronic medical records were implemented. Vendor is responsive to make client recommendations with cutting edge improvements.

## Individual EHR Vendor Key Performance, Inpatient Hospital Over 300 Beds

### 3. Training

Table 7: Electronic medical and health record vendor leadership provides significant and meaningful training opportunities for internal employees and client staff. Leadership strives to develop technology staff, EMR/EHR client service and customer servicing consultant employees in particular. Training modules are effective and practical so that minimal post-implementation training is required on or off site. Regular updates are timely and require minimal additional training to implement.

## Individual EHR Vendor Key Performance, Inpatient Hospital Over 300 Beds

### 4. Client relationships and cultural fit

Table 8: EHR vendor leadership honors customer relationships highly. The relationship with the EHR elevates the customer reputation. Improving physician practice and healthcare delivery efficiency and effectiveness is a priority of the supplier. Governance of engagement is neither complex for buyer nor does it require vendor management attention regularly. There is no regular transparency or quality issue. There are no culture clashes or misfits that threaten relationship's success or client's satisfaction.

### 5. Trust, Accountability and Transparency

Table 9: Trust in enterprise reputation is important to EHR clients as well as prospects. Client possesses an understanding that its EHR organization has the people, processes, and resources to effectively deliver the desired business and clinical results, based on its industry reputation and past performance. There are no disconnects between promises and delivery

### 6. Breadth of offerings, varied client settings, delivery excellence across all user types

Table 10: EMR/EHR vendor offers industry recognized horizontal functionality and vertical industry applications, and manage bundled EMR services such as ePrescribing and developing new e-Health initiatives. Vendor routinely drives operational performance improvements and results in the areas they affect. Comprehensive offerings are constructed to meet the unique needs of the client's EHR initiatives. Breadth of vendor modules offers comprehensive system services and broad modules.

### 7. Deployment and EHR implementation

Table 11: EHR client deploys at a pace acceptable to the client. EHR solutions eliminate excessive supervision over vendor implementations. Vendor overcomes client implementation obstacles and challenges effectively. Technical, organizational and cultural implementation obstacles are handled professionally and punctually. EHR implementation time meets standard expectations. Implementations are efficient and sensitive to users' specific situations which may cause delays.

### 8. Customization

Table 12: EHR products and process services are customized to meet the unique needs of specific practice client purpose, processes and physician models. Little resistance is encountered when changing performance measurements as clients' needs vary. Extraordinary efforts are made to adapt and convert client special needs into workable solutions with efficient cost and time considerations. EMR software allows for modifications that are not costly or complex.

### 9. Integration and interfaces

Table 13: EHR vendor supports interfaces so information can be shared between necessary applications. Solutions are easily integrated to existing backend systems as needed and HIE feasible. Seamless interfaces to legacy applications are performed as required for optimal functioning. Human integration and interface activities are administered precisely. Systems communicate effectively among provider groups and ancillaries. True interoperability with other healthcare organizations is factored into implementation.

### 18. Best of breed technology, MU 3 and process improvement

Table 22: EHR management and related technology services are considered best of breed. EHR Vendor technology elevates customers via capabilities, equipment, processes, deliverables, professional staff, leadership, quality assurance and innovative initiatives. EHR services are delivered at or above current/former in-house service levels. Technology is current and relevant to exchanging health information among providers, as well as sufficiently offering patient access.
